

GYNEFLEX

EMBRYO TRANSFER CATHETER FOR DIFFICULT EMBRYO TRANSFERS

The Gyneflex is a reusable economical embryo transfer catheter for difficult cervical passage.

FEATURES

- visible markings for exact positioning
- combined with a single use embryo transfer catheter: Emtrac C-200 or -240
- bulb tip enables easy atraumatic cervical passage
- flexible end which enables it to follow the cervical canal
- flat curved version available in case of a less flexed uterus: #Gyneflex-200FC
